

APPX Conference & Training Session

Cansys West International Ltd

**November
12 - 16,
2007**

Where? NH Hotel Amsterdam Centre, Amsterdam
When? November 12 - 14, 2007
Training runs from 9:00 to 5:00 daily. Coffee and Lunch provided.

Prior to the conference, we are offering three days of training courses for developers who want to expand their existing APPX knowledge.

Monday, 12 November

GUI Migration/Design

This class will cover design techniques using the latest GUI techniques, including features for adding images, icons, the drag and drop data palette, buttons, boxes, designing GUI outputs, printing with PDF, dynamic Widget creation/modification, and more. Students will work with a character mode Order Entry system and convert it to a GUI based application.

Tuesday, 13 November

Web Development

Learn how to make existing APPX reports display on an HTML page and how to design new applications for interactive web access. Some knowledge of HTML is assumed. Students who have never worked with HTML may not get the full benefit of the course. The class focuses on integrating applications with HTML. Students will also learn about APPX/NET and how to integrate Appx with XML based or Web 2.0 based applications (using AJAX). The students will get a copy of the WEB application used during the course as well as the CGI scripts used to integrate APPX to the Unix based web server. These materials can then be used as a starting point for their own web development projects.

Wednesday AM, 14 November

Installing 4.3

This session will cover installing and using the new features in 4.3. Naturally, the information will be available from ASI when 4.3 is released, but this will be an opportunity for customers who haven't yet upgraded to 4.3 to get some hands-on experience with the new features, such as the new auditing features, data encryption, SSL connections, Source Code Control, etc.

Wednesday PM, 14 November

Tips & Techniques

This will be a wide ranging session covering different tips, tricks and techniques for the APPX developer.

See Registration Form for costs and Hotel Information.

We look forward to seeing you there!
